Magnum, Breath Of Life

Here we are again, always dream of places Near and far, all those different faces I'm going to take it like a breath of life

Here we are again, we don't make much difference Never start, pray for our forgiveness Then we take it like a breath of life

From the wilderness all of us climb
Just a blink at the end of all time
Everyday watch the sun on the rise
Always looking, the moon and the stars in our eyes
From the wilderness all of us climb
Just a blink at the end of all time
Everyday watch the sun on the rise
Always looking, the moon and the stars in our eyes

So here we are again, like a dream unfolded Every star, every theme exploded Still we take it like a breath of life

From the wilderness all of us climb
Just a blink at the end of all time
Everyday watch the sun on the rise
Always looking, the moon and the stars in our eyes
From the wilderness all of us climb
Just a blink at the end of all time
Everyday watch the sun on the rise
Always looking, the moon and the stars in our eyes

Keep burning bright way beyond time No shadows light up this long empty night

From the wilderness all of us climb
Just a blink at the end of all time
Everyday watch the sun on the rise
Always looking, the moon and the stars in our eyes
From the wilderness all of us climb
Just a blink at the end of all time
Everyday watch the sun on the rise
Always looking, the moon and the stars in our eyes
