

Magnum, Everyday

There's no confusion, no talk of losing
It's one thing I know real well
You've got the power, steal every hour
As far as I can tell

This fascination's an education
I do enjoy the ride
Over and over these feelings come closer
It's something you really can't hide

Time flies by - don't know why

But everyday of my life
I could fall for you like I always do
Everyday of my life
I would crawl to you like I always do

No past, no future, won't try to fool you
I know I'll get it right
I can't do it your way and do what you say
This ain't no back street fight

This fascination's an education
I do enjoy the ride
Over and over these feelings come closer
It's something you really can't hide

Time flies by - don't know why

But everyday of my life
I could fall for you like I always do
Everyday of my life
I would crawl to you like I always do

I hang on your words, I get lost in your eyes
Help me to promise but teach me to lie
Take me to somewhere that I've never been
Show me the magic that I've never seen

Everyday of my life
I could fall for you like I always do
Everyday of my life
I would crawl to you like I always do
