

Major Lazer & Khalid, Trigger

no baby
can't tell you why we
ain't getting high no more
tried so hard
there's something I've been feeling
and we're lonely
but we never used to be
either we're arguing or you leave
we both know something missing

I've been holding on
holding on to nothing
you don't care too much
and it's obvious
that you're already gone
so unleash your weapon
aim it at my chest then

if you love is a drug
you're the one who hit the trigger
shoot me down
show me down
I don't wanna remember you
don't try to change your mind
when the blood is on your hands
shoot me down
show me down
I don't wanna remember you

soul to soul
we used to rock so slow
I felt your blood boil
and my heartbeat rush
you free me
why's it flipping?
there's no one left
go on and hold your breath
say that you want me
but you don't want stress
I can't say that I feel different
