

Marillion, Half The World

When youre driving through the city
I hope all your lights are green
And the boy you choose to live with
Well, I hope hes never mean

When you stop a while to think
I hope your thoughts dont drag you down
When youve had too much to drink
I hope the room dont spin around

Youre a girl half the world could fall in love with

Doo doo doo..

I hope you never get insomnia
And all your dreams are sweet
And that everybody smiles at you
When they see you on the street

I hope you think about me sometimes
But not enough to cause you pain
And someday that we can say were friends again

Youre a girl half the world could fall in love with
Youre a girl half the world could fall in love
Could fall in love with

Doo doo doo..

Youre a girl half the world could fall in love with
Half the world could fall in love
Youre a girl half the world could fall in love with
