

Marjorie Fair, Stare

These are things I feel but dont want to say
incase you feel that way
these are things I know but dont want to say
incase you feel that way
I'll wait another day
I can never change
cause the pain just makes me want to stare
at the same things I saw before
thinking there's something more
god it's a lonely place

I will never know how you feel
about the things I think about
will I get a chance to make up to you
the things I kept from you
you know I wanted to
I can never change
the pain just makes me want to stare
at the same things I saw before
thinking that something's wrong
god it's a lonely place

say the same things you said before
wanting you even more
god it's a lonely place

I can never change
the pain just makes me want to stare
at the same things I saw before
thinking theres something wrong
god it's a lonely place
say the same things you said before
wanting you even more
god it's a lonely place
