

Mastodon, High Road

You let the wind take us down.
You let the storm come wipe us out
I saw the fog snuff you out
I saw the ocean come take you under.

I have my boot stuck in your mouth.
I have you screaming for your last breath, yeah.
I shoved them both deep inside.
You're waiting for the devour

You take the high road down,
I take the ground below you.
You take the high road down,
I take the ground below.

You are the one who nobody likes?
You are the plague that was brought here by rats
I like to hunt you, lets fight
Watching you fade out and never come back

You take the high road down,
I take the ground below you.
You take the high road down,
I take the ground below.

You take the high road down,
I take the ground below you.
You take the high road down,
I take the ground below.
