

# Matkosky & Devries & Leonard, Stars align

You did something to me baby  
Always wanted you to know

All that I want,  
Everything that I need  
How I get so far from home?

The stars align most every time  
When lonely lights collide  
I am your crossbow  
I am the rainbow  
Just let go and let it shine

The way you move me  
You see right through me  
I can't help but fall for you

The stars align most every time  
When lonely lights collide  
I am your crossbow  
I am the rainbow  
Just let go and let it shin

I can hear you sing to me  
You make me feel alive  
I can't wait to celebrate  
'Cause in your arms I can fly

The stars align most every time  
When lonely lights collide  
I am your crossbow  
I am the rainbow  
Just let go and let it shin

You did something to me baby  
Always wanted you to know□
