

Meat Loaf, Because Of You

I was so hypnotized by the smile in your eyes today
Flying free as a bird caught inside every word you say
I want everyone to see...

This is big time
This is larger than life
See the sparks fly
When you're standing by my side
Every step, every move, everything I do
Life is beautiful because of you

Every breath that you give
You're my sweet oxygen my friend
You made me follow it fast so my dreams could get past the end
I want everyone to feel...

This is big time
This is larger than life
See the sparks fly when you're standing by my side
When you're standing by my side
Every step, every move, everything I do
Life is beautiful because of you

How did I survive before you came into my life?
Now I'd do anything at all, anything at all
For you

This is big time
This is larger than life
See the sparks fly
When you're standing by my side
Every step, every move, everything I do
Life is beautiful because of you
