

Meat Loaf, Fallen Angel

I took one look and something snapped inside,
I said I love your eyes
You took my heart, you took my breath away,
I felt my temperature rise
You said you've never loved a man this way
That it was heaven you were here to stay

[Chorus:]

And now you're just another fallen angel
And I hope that the fall didn't do you no harm
And now you're just another fallen angel
Falling into somebody else's arms

I took one look and I was paralyzed and was in paradise
I must admit that when I first laid eyes,
you had me hypnotized
You said I'm sorry but I don't say much
And I'm in heaven when I feel your touch

[Chorus]

Follow your own road baby, I'll be there when you need me
To love and to comfort you
And what he got ain't enough to keep you in the air -
I'll be there

You said you've never loved a man this way
That it was heaven you were here to stay

[Chorus]
