

Meg Donnelly , Smile

And that's a good mood
How you feelin like you gettin in a good groove
Feelin better than you're feelin in a while
I just wanna make you smile (smile, smile, smile)

You light me up
Electricity like every time we touch
We're young and dumb
No one runnin through the city like us
You make me see stars in the stoplights
Fast cars throw our hands high
It's getting ho-o-ot in the sunlight
We got the drop top-top in the sunshine
How you so cool
When you ride through
Make me see two
Head spinning unscrewed

And that's a good mood
Have you feelin like you gettin in a good groove
Feeling better than you're feelin in a while
I just wanna make you smile (smile, smile, smile)

And that's a good mood
Have you feelin like you gettin in a good groove
Feelin better than you're feelin in a while I just wanna make you smile (smile, smile, smile)

When we met it was a summer
I remember heat and fireworks lights
Said I was a stunner (said I was a stunner)
Had me feelin I was comin alive
Two moons in your headlights
Outer space feelin so high
Pick me up for a long drive
Young love make the night fly!

How you so cool
When you ride through
Make me see two
Head spinnin unscrewed

And that's a good mood
Have you feelin like you gettin in a good groove
Feelin better than you're feelin in a while I just wanna make you smile (smile, smile, smile)

And that's a good mood
Have you feelin like you gettin in a good groove
Feelin better than you're feelin in a while
I just wanna make you smile (smile, smile, smile)

I just wanna make you
I just wanna make you
I just wanna make you smile smile smile
I just wanna make you
I just wanna make you
I just wanna make you smile smile smile

And that's a good mood
Have you feelin like you gettin in a good groove
Feelin better than you're feelin in a while
I just wanna make you smile (smile, smile, smile.)
