

Melanie Fiona, Watch Me Work (ft. Sebastian Vettel)

Sick of ordinary days you wanna scream and shout
Feeling like it's time to change, get a little wild
Come up from behind the shade, be a rebel child
Gonna raise some hell tonight
Cause it's alright, don't have to be afraid
There's a spotlight, that's shining just for you
Go the distance, then show 'em what we're really made of

Watch me work, something different, something new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work

Set the status quo in place, let them other burn
Show them that you're here to stay, tell them watch and learn
Time to put the wheels in motion, never to return
Get on with myself tonight

Cause it's alright, don't have to be afraid
There's a spotlight, that's shining just for you
Go the distance, then show 'em what we're really made of

Watch me work, something different, something new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work

Time to break free from these chains
I'm on a mission, wanna live my life today
I thought I told you, I'm taking over
Talk is cheap so it's better if I showed you

Watch me work, something different, something new
Watch me work, out the box, out the blue
Watch me work, something sexy, something fine
Watch me work, out the box, blow your mind
Watch me work

Something different, something new
Out the box, out the blue
Something sexy, something fine
Out the box, blow your mind
Watch me work
