

Midtown, God Is Dead

Just because we're abandoned
Doesn't mean we're alone
Falling down when were empty
Because I know, yes I know

Nothing here really matters
Nothing helps when you're lost
Break me down to an atom
Because I know, yes I know

It's a whole new different world
What you've got to say

Save yourself
There's no salvation

Home is found where the heart is
Space is found in our homes
Shots ring out across the city
Because I know, yes I know

So what you've got to say
It's a whole new different world
What you've got
