

# Milky Chance, Frequency of Love

I thought I been walking on the moon  
Well not every dream comes true  
Feels like my world is breaking down  
But what if you save me, save me now  
Call me back no matter where you are  
Cause when I hear your voice talk to me  
I fall in love with your frequency

Now we got blinded by the sun  
Like all summer dreams seem true  
It was your eyes that taught me how to see  
It was the feeling of being free  
Call me back no matter where you are  
Cause when I hear your voice talk to me  
I fall in love with your frequency

I tell you what it was  
The frequency of love
