

# Moneybrother, Just Another Summer

Now the summer is just another summer  
And your lover is just another lover  
I want a hold, a night like that with you again

Tom brought the stereo and there he goes  
Connect the cable to the generator and you know  
The heart, the beat, the night, was all around us  
I move though I normally don't dance much  
Get close cause girl I want a little touch  
The heart, the beat, the night, was all around us

We take a walk through the fields to get lonely  
And girl our feet got wet from the morning dew  
I remember how you pulled up to me  
And I remember the first kiss i gave to you

In oh so many ways  
I still look back on those days

Now the summer is just another summer  
And your lover is just another lover  
I want a hold, a night like that with you again

These days you're weary baby, get home from work, girl, finding you  
All dressed up in our bed fast asleep  
I turn the lights down and I get your shirt off  
You mumble something baby, I don't get a word though  
'Bout the heart, the beat, the night that's all around us

You'll get up early baby, you better sleep tight  
I sit right down and put the TV on  
I can feel my mind begin to slip, right  
Back to the long hot night were we belong

In oh so many ways  
Still look back on those days

Now the summer is just another summer  
And your lover is just another lover  
I want a hold, a night like that with you again

In oh so many ways  
Still look back on those days

Now the summer is just another summer  
And your lover is just another lover  
Nor the heart, nor the beat, nor the night  
They ain't around here baby something aint right  
Cause the summer is just another summer  
And your lover is just another lover  
Now can I hold a night like that with you again
