Compliance

We just need your compliance
You will feel no pain anymore
And no more defiance
We just need your compliance
Just give us your compliance
We won't let you feel lost anymore
No more self-reliance

Fall into line, you will do as you're told
No choice fatigue, your blood is running cold
We lose control, the world will fall apart
Love of your life, we'll mend your broken heart

Life lived in fear, you need protection
You're all alone, too much rejection
We have what you need, just reach out and touch
We can save you

We just need your compliance
We just need your compliance
You will feel no pain anymore
No more defiance
Just give us your compliance

Cover your tracks, we know what's best for you
You've bitten off, much more than you can chew
You're running scared, you'll run into our arms
Come join our clique, we'll keep you safe from harm
Our toy soldier, you'll do the dirty work
Stay loyal to us, we'll take away the hurt
We have what you need, just reach out and touch
We can save you

Just give us your compliance
We just need your compliance
You will feel no pain anymore
No more defiance
Just give us your compliance
