

N.E.R.D., Am I High

La la la la

Listen

La la la

Hey

Didn't you know I can help or hurt you

So there's no reason to lie

I bet you let those other niggas jerk you

Convince you that they are fly

I never said I was an angel

Said but I ain't like those other guys

Listen

You're convinced that our experience rearranged you

Well maybe you should reexamine

How you tried

Or

[3x]

Am I High

I think I've loved you since our high school

But you only wanted friends of mine

So when they replied

Her she's cool

Only then you gave our friendship time

You won't say it but you think I'm changing

Is it because the whole world calls me drugs

Didn't I say I can help or hurt you

You should be paranoid without me

and with me feel a buzz

Is that cocky or what

Or

[3x]

Am I High

It's the kinda high that got me leaning

120 speeding in the rain

Meaning of a hydroplane

Play both sides of the field

See I know pain

Keep 'em high like Kurt Cobain

Listen

I'm known for speaking my mind

Known for fleeing from the scene of a crime

Eyes redder than the beam of my nine

Eyes redder than the scene of that crime

All for the love of the lime

I'm so high

Insinuating you're not that way

I see how you look and use your eyes

But when I ask you can I jump in

Then you start again with the lines

But if I dare you you'd blow a kiss to another

Though my friends have no idea who you could be

Don't worry I would never tell another

But I ate your pussy as you layed there beside her yes she was asleep

[3x]

Am I High

Why am I sitting here

Peering the sky

Is there something inside of me or am I high

From when we talk on the phone 'til when we fuck
This sounds like deep lust to me
But I get high on your love

Am I High
