

Nana Zorin, Desire Bout

Drive, drive me away
Away from the city
Into the country

I would stand in rain
We could have a baby
...Baby
Just ask me

To live in hope is better than make your dreams come true...

Drive, drive me away
Away from the city
Into the country

Drive, drive me away
Away from the city
Into the country
...Drive

I would stand in rain
We could make a baby
Just ask me
We could have a party

To live in hope is better than
make your dreams come true
And the black holes hinter us
from seeing the future
Why would anybody want to live
in the hydrophonic forest

To live in hope is better than
make your dreams come true
And the black holes hinter us
from seeing the future
Why would anybody want to live
in the hydrophonic forest

I would stand in rain
We could make a baby
Just ask me
We could have a party
We could have a party

Drive, drive me away
Away from the city
Into the country

Drive, drive me away
Away from the city
Into the country
...Drive

Just ask me
I would stay in rain
We could make a baby
Just ask me
