

# Nanowar Of Steel, Uranus

I like it big, I like it cold  
I like it blue, I like it bold  
I like it with a two % of methane  
It's Uranus!

I want it icy, I want it large  
I want it spicy, with electric charge  
Fluid outside and rocky inside  
Like Uranus!

Pluto, Pluto  
You're cold and far, not even a planet  
Venus, Venus  
Too much CO2!  
Mars, Mars, Mars, Mars  
Ain't enough magnetosphere  
There's only a place where I wanna go!  
I'm gonna head right to Uranus

Uranus, Uranus  
Coz I'm an astronomy aficionado  
I wanna observe Uranus  
Uranus, Uranus  
My shuttle's fast like a torpedo  
It's gonna pierce Uranus

A 6.2 inch telescope  
Held in Willam Herschel's hands  
Allowed the world to see how wide  
Is Uranus!

No more a hobby, for the few  
Thanks to the astro-amateurs  
Now everyone can enjoy the view  
Of Uranus!

Saturn, Saturn  
Your rings vibrate and I hesitate  
Jupiter, Jupiter  
It's gassy and brown  
Neptune, Neptune  
A huge Calippo too big to swallow  
There's only a place where we can go!  
I gotta settle on Uranus

Uranus, Uranus  
I'm solar system's peeping Tom  
I wanna stare at Uranus  
Uranus, Uranus  
An old joke still deserves a song  
So sing along "Give me Uranus!"

The highest goal of humankind, the search for different forms of life  
I'll send my probe, Voyeur 2, 19 AUs deep into

Uranus, Uranus  
Coz I'm an astronomy aficionado  
I wanna explore Uranus  
Uranus, Uranus  
My shuttle left like a torpedo  
It's gonna land on Uranus  
I wanna dive in Uranus  
Gonna colon-ize Uranus
