

# Ne-Yo, Jealous

Oooh

Jealous of the way that dress is huggin you  
How it caresses your body as you move  
So upset cause I wish I could touch you too  
The things you make me wanna do

Oooh, baby

What I wouldnt give to be your shoe

Just so I could caress your feet

Dont have a clue

Youre the instant of how much Im feelin you

Baby, wont you let me come and tell you bout it

Know that I could be that lipstick on your lips

Babe I wish I was that skirt thats round your hips

And I know it might sound funny when I tell you this

But everything that touches you has me so, jealous

Cant believe Im envious of your Chardonnay (baby!)

Oh how I wish you would kiss me that way

I would let you drink from me any day

Oh how you hurt me baby

I dont wanna make you think Im comfortably insane

I just like what I see

And I want it all for me baby

Im goin crazy!

Know that I could be that lipstick on your lips

I wish I could be that skirt thats round your hips

And I know it might sound funny when I tell you this

But everything that touches you has me so, jealous

And I may be a bit over protective

Im ok with that

You got me and you and me and you

Ghettos and Gs

Im so on this love of mine

Know that I could be that lipstick on your lips

I wish I could be that skirt thats round your hips

And I know it might sound funny when I tell you this

But everything that touches you has me so, jealous

Know that I could be that lipstick on your lips

Babe I wish I was that skirt thats round your hips

And I know it might sound funny when I tell you this

But everything that touches you has me so, jealous

Know that I could be that lipstick on your lips

Babe I wish I was that skirt thats round your hips

And I know it might sound funny when I tell you this

But everything that touches you has me so, jealous

Know that I could be that lipstick on your lips

Babe I wish I was that skirt thats round your hips

And I know it might sound funny when I tell you this

But everything that touches you has me so, jealous

(fade until end)
