## Neil Finn, World Where You Live

Here's someone now whose got the muscle His steady hand could move a mountain Expert in bed but come on now There must be something missing That golden one leads a double life You'll find out But I don't know where you go Do you climb into space To the world where you live The world where you live

So here we lie against each other These four walls can never hold us We're looking for wide open spaces High above the kitchen And we're strangers here On our way to some other place But I don't know where you go Do you climb into space To the world where you live The world where you live The world where you live

When friends come round You might remember and be sad Behind their eyes is unfamiliar Do you climb into space To the world where you live The world where you live...
