Yo, I wanna explain somethin to all the, squares out there  
Uhh, they may not know what 24, woodgrain and leather with a hole is  
24 inches or twenty-four inch rims in diameter  
Woodgrain is the type of material that goes like on the dashboard or your doors  
Leather is like your seats  
And the hole is what they call a sunroof  
Or maybe a three-way power hole
