Nevershoutnever, Shesgotstyle

If it's not those cowboy boots in the summer Oh my God, I pray for another Chance to drive down back highways Until I stumble upon your beautiful face Presence isn't what kills me

It's that artistic gleam

That's taking over my scenery

Dream by dream

You might think I'm incapable

Of loving a soul like yours

You might think I'm a fool

For you

'Cause girl you got style That what I love about you

The way that you sit back, oh how you sit back

and watch this grow

You got dreams

And therefore I believe in you

All the small town people with their big remarks They ain't got jack to say about my movie star she's got style

If it's not the fact that I'm a wee bit younger

Or the truth that i'm so naive

My heart keeps leaping back to you

Like a dog tied to a tree I know it sounds crazy It's ridiculous to me

But without you by my side girl You might think I'm incapable

Of loving a soul like yours

You might think I'm á fool

For you

'Cause girl you got style That what I love about you

The way that you sit back, oh how you sit back

and watch this grow

You got dreams

And therefore I believe in you

All the small town people with their big remarks
They ain't got jack to say about my movie star
What are the odds of finding someone just like you
Tell me why I never wanted to go back home

I'm still falling for you today
