

# Niall Horan, Heartbreak Weather

[Verse 1]

I swear there was lightnin' comin' from your eyes  
Startin' a fire in our hotel room  
And yeah, we were dancin', dancin' to Bruno  
And I couldn't turn away from you  
Yeah, I saw you smilin', breakin' the silence  
Tellin' me just what you want  
There in the moment, I was reminded  
I haven't felt this way in a while

[Refrain]

Blinded by the sparks  
We were drivin' around in the dark  
Findin' reasons to stay where we are

[Chorus]

All of my life, I've been sleepwalk livin'  
Runnin' around the same bars I've been in  
It can be so lonely in this city  
But it feels different when you're with me  
All of my life, it's been heartbreak weather  
Thinkin' to myself, it won't get better  
It can be so lonely in this city  
But it feels different when you're with me

[Verse 2]

Yeah, it was magic  
You were a vision, watchin' the way your body moves  
You're takin' your clothes off, you look in the mirror  
Tellin' me just what you want

[Refrain]

And I was blinded by the sparks  
I was holdin' you close in the dark  
Findin' reasons to stay where we are

[Chorus]

All of my life, I've been sleepwalk livin'  
Runnin' around the same bars I've been in  
It can be so lonely in this city  
But it feels different when you're with me  
All of my life, it's been heartbreak weather  
Thinkin' to myself, it won't get better  
It can be so lonely in this city  
But it feels different when you're with me

[Bridge]

You, that's what I've been missin'  
Words tangled up and twisted  
Now, all the clouds been lifted  
Lately, my heart's been so empty  
You, that's what I've been missin'  
Words tangled up and twisted  
Now, all the clouds been lifted  
Lately, my heart's been so empty

[Chorus]

But it feels different when you're with me  
It feels different when you're with me  
All of my life, it's been heartbreak weather  
Thinkin' to myself, it won't get better  
It can be so lonely in this city  
But it feels different when you're with me  
It feels different when you're with me
