No Doubt, Greener Pastures

Go ahead, get out and see the world But then I think, why should I I'd rather stay home and cry I never thought that I could be the other The other way like the other ones Let me open wide, let you see inside And then you might agree

Would you say they find me unstable 'Cause they see me act a little bit different But I know my way to greener pastures and Think about it, won't you think it over Please

Without you I can move I can stretch my arms out, I can feel it And when I'm in my room alone I feel good Because I don't have to deal with you or the outside world

Would you say they find me unstable 'Cause they see me act a little bit different But I know my way to greener pastures and Think about it, won't you think it over Please

I guess I'll get over it Ooh - I guess I'll get over it I guess I'll get over it I guess I'll get over it

Would you say they find me unstable
'Cause they see me act a little bit different
But I know my way through greener pastures
Would you say they find me unstable
'Cause they see me act a little bit different
But I know my way through greener pastures
Would you say they find me unstable
'Cause they see me act a little bit different
But I know my way through greener pastures
Greener pastures
See me act a little bit different
But I know my way through greener pastures
