

NorthTale, Only Human

Face it, you can never really know
What lies beneath this reality
Maybe we can now regain control
We must not let them come between us all

Magic fire
No more liars
We won't stray from our desires

This is our quest for freedom
To bring the masters to their knees
Making our way through mistakes
We're only human, can't you see?

Breaking all the chains that hold us down
Pain will make us that much stronger
Make 'em, make'em watch us as they fall
We'll rise again, hear our freedom call

Magic fire
No more liars
We won't stray from our desires

This is our quest for freedom
To bring the masters to their knees
Making our way through mistakes
We're only human, can't you see?

We're only human

This is our quest for freedom
To bring the masters to their knees
Making our way through mistakes
We're only human, can't you see?
