

Nothing But Thieves, Amsterdam

People don't know much
Need a whiskey crash
To think something new

Hey you watching me
Looking through a screen
I'm here in front of you

Something the days
They feel so long
We all live under the same Sun

So I hit my head up against the wall
Over and over and Over and over again
Cause I don't wanna be like them
So I hit my head up against the wall
Over and over and Over and over again
Again and again

People piss you off
Some you say you love
Those you call a friend

Walking through the crowd
Then you look around
See there's no one left

We like and then we die as One
We all live under the same Sun

So I hit my head up against the wall
Over and over and Over and over again
Cause I don't wanna be like them
So I hit my head up against the wall
Over and over and Over and over again
Again and again

I left my heart in Amsterdam /
Where I could dream and night were long
I left my heart in Amsterdam
So I hit my head up against the wall
Over and over

So I hit my head up against the wall
Over and over and Over and over again
Cause I don't wanna be like them
So I hit my head up against the wall
Over and over and Over and over again
Again and again

I left my heart in Amsterdam /4x
