

NRG, What!

Take from me everything of you
Though I erase and erase
Its still there Get away
If you want, if you want whatever
I did everything for you
Because of the lies of it being love
Never never never
Another time
Never never never
I dont miss you
Will you just leave me now
Never never never
I dont believe
Never never never
Because of your evasive words
I dont want to become alone but you
What Your love you told me about
What The promise to always be together
What Everything sweet like that
What What What What
so tell me
What Just leave please
What All the memories of loving you
Cause I never gonna
break me down
Ohh babe When you left me
Though I face that moment again
I love you
Those words that cant do anything
Till the end you were to me
Nothing but lies left behind
End it and make it so I wont see you again
Never never never
Another time
Never never never
I dont miss you
Will you just leave me now
Never never never
Another time
Never never never
Because of your evasive words
I dont want to become alone but you
What Your love you told me about
What The promise to always be together
What Everything sweet like that
What What What What
so tell me
What Just leave please
What All the memories of loving you
Cause I never gonna
break me down
To forget you to forget everything again
Many times over and over though I say
Its a scar that is not erasable
What Your love you told me about
What The promise to always be together
What Everything sweet like that
What What What What
so tell me
What Just leave please
What All the memories of loving you
I set one more time
What My tears for you
What That expensive gift

What I wont drop them again
What What What What
so tell me
What Full of lies
What There is no you inside me
Cause I never gonna
break me down
