## Nylon Beat, Poison

Every night and every day I think of you and want to say You're deadly company And every where I go or stay This feeling will find its way Your love is killing me

Love's poison, poison Cause anything else doesn't matter to me Before long it's all gone My bittersweet love's running free

Love is poison, poison Addicted to something I just can't leave I'm on this poison It's everything I ever need

I can't think of being without No one crumbling in announce There's no cure for me It's the way you touched my heart Stay 'till death drew us apart Hear my remedy

Love's poison, poison Cause anything else doesn't matter to me Before long it's all gone My bittersweet love's running free

Love is poison, poison Addicted to something I just can't leave I'm on this poison It's everything I ever need
