

# Ocean Colour Scene, Drive Away

C / Am / Dm / G

You drive the away the best of you  
It's all that's left to say  
You leave me with the rest of you  
You've made it on your way  
I need a call to say from you  
Just before you go  
The more that I've been close with you  
The door was always closed

Drive away and all, there's nothing you should say  
Drive away and all, we're travellers anyway

Get on up and straight you go  
There's nothing left to say  
Begging's not my place you know  
You wouldn't hear it anyway  
'Cos all the days I begged you stay  
I saw it made you blind  
There's more than I can really say  
What it is that traps you all inside

Drive away and all, there's nothing you should say  
Drive away and all, we're travellers anyway

You made it all get so uptight  
I made it in between  
You went and wronged all the rights  
Then you hid behind your screen  
You're headed where I just don't know  
I think you've gone inside  
I hope the world looks good from there  
Well I hope it looks all right

We never made it all the way  
We never made it all the way  
You take the best of you  
I keep the rest of you

Drive away and all, there's nothing you should say  
Drive away and all, we're travellers anyway
