

Orange 9mm, Can't Decide

Stand real close to me and do just like I do
Open your mind and cock the trigger back far
Pull it at the point where you feel most pain
Pull it at the point where you feel most alive
I can't live
Lifes so dirty
We're so lost
Standing on the edge of our lives without a dime
or a thought or a dream
Dizzy just crying to fall head over heels in love with something
We are waiting for our hits to come
We are waiting for our hits to come
And I can feel mine rolling along
Like a song that makes me warm
I can see yours rolling along
Your eyes tell me nothing's wrong
How does this feel

To smile through our tears
And grasp wild in the darkness no fears
Standing on the edge of our lives without a dime
Or a thought for a dream
Dizzy just crying to fall head over heels in love with something
Stand real close to me and do just like I do
Open your mind and cock the trigger back far
Pull it at the point where you feel most pain
Pull it at the point where you feel most alive
I know I can't live
I know we can't live
Life's so dirty
We're so lost
Standing on the edge of out lives
Without a dime or a thought for a dream
Dizzy just crying to fall head over heels in love with something
