Orange 9mm, Can't Decide

Stand real close to me and do just like I do Open your mind and cock the trigger back far Pull it at the point where you feel most pain Pull it at the point where you feel most alive I can't live Lifes so dirty We're so lost Standing on the edge of our lives without a dime or a thought or a dream Dizzy just crying to fall head over heels in love with something We are waiting for our hits to come We are waiting for our hits to come And I can feel mine rolling along Like a song that makes me warm I can see yours rolling along Your eyes tell me nothing's wrong How does this feel

To smile through our tears And grasp wild in the darkness no fears Standing on the edge of our lives without a dime Or a thought for a dream Dizzy just crying to fall head over heels in love with something Stand real close to me and do just like I do Open your mind and cock the trigger back far Pull it at the point where you feel most pain Pull it at the point where you feel most alive I know I can't live I know we can't live Life's so dirty We're so lost Standing on the edge of out lives Without a dime or a thought for a dream Dizzy just crying to fall head over heels in love with something
