

Palantir, Among the Stars

A flicker of light in the darkness of eternity
A glimmer of hope in the eyes of a child
Piercing the skies, it's a wonder of technology
Into the void you go alone

A moment of truth for the future of humanity
Singing along to the music of spheres
Standing in awe as you bend the laws of gravity
Watching the skies, we feel alive

Alive!

Leaving everything behind
For the knowledge of mankind
Ancient gods and birds of prey
Took us where we are today

Men and women of the stars
Investigating life on Mars
These are the heroes of our time
Their contributions are sublime

Among the stars
There are secrets to be found
Inside your heart
There's a dream to lead the way

Since the dawn of history
We've tried to solve this mystery
Are we alone, or could it be
Life's just too far away to see

Among the stars
There are secrets to be found
Inside your heart
There's a dream to lead the way

Like paper planes in a dream
Gliding onwards to worlds unseen

How small we all seem to be
When you're face to face with infinity

Will you find any answers?
Or questions still unasked?
Beyond the black

Among the stars
There are secrets to be found
Inside your heart
There's a dream to lead the way

Among the stars
There are secrets to be found
Inside your heart
There's a dream to lead the way
