

Papa Roach, Come Around

in between a rick ad a hard place
tryna find your way through the dark days
but you don't know how you flip the world upside down
and right now,
you don't wanna show it
cause you don't think that anyone will notice
until you feel someone
you 'll feel like you're the only one
and everybody says they're fine
but I know we're not alright
but I know we're mot alright

it's always dark as just before the light
I know your silence is a deadly sound
it's never easy when you're breaking down
but I'll be there when you came around

face down in the days that we wasted
tryna find our way through the mazes
we can wait this out
or walk though that fire somehow
you tryna should turn around now and leave 'em
cause you can lose your mind
yrying to live back in time
and everybody says they're fine
but I know we're not alright
but I know we're mot alright

it's always dark as just before the light
I know your silence is a deadly sound
it's never easy when you're breaking down
but I'll be there when you came around

when we come around
I know we are not alright

it's always dark as just before the light
I know your silence is a deadly sound
it's never easy when you're breaking down
but I'll be there when you came around
