

Paul Carrack, Always Have Always Will

If you're wondering if your love
Will stand the test of time
I'm here to tell you I can put your mind at ease
Ain't nothing in the whole wide world that could ever make me leave
How could I ever walk away
Darlin' I need your love each and every day
Always have, always will
If you should ask me do I love you still
Without shame without blame
I always have and always will
I always have and always will
I remember, there were times
When my heart could not conceive
Something so beautiful bould happen in this life
A precious gift to me worth and sacrifice
There is no doubt or mystery
It's obvious that you mean everything to me
Always have, always will
It was almost like your heart called out my name
I was helpless from the start
I knew right there and then I'd never be the same
Never never
I'd never be the same
