

Phoenix Rizing, Out In The Endless Space

[Intro:]

Here we are, we are stranded
Lost in a long forgotten world
Lightyears we have travelled
Escaped from the wasteland Mother Earth
I remember the smoke and the fire from the sky
I remember the spaceship
and our last goodbye
Lost in an unknown dimension
Prisoners of another time
Strangers in a strange world
But I remember so well

[Chorus:]

Winter...summer, days and nights
Darkness...that's following the light
Creation...so beautiful divine
Out in the endless space we ride
I guess it's happened all before
We will survive forevermore
I remember what happened, does our planet still exist
Our saviours cannot answer
They are cold-hearted machines
They tried to save us from death
The effacement of our race
Avoid the people from vanishing
Lost without a trace

[Chorus x2]

What did we find
The circle is spinning around and around
And the future we lost somewhere in time
See a new star is born, a white light in the horizon
A creation so beautiful divine
Feel the rain of redemption for all dreams we left behind
A new dawn of existence we will find
A new dawn of existence we will find.
