## Piebald, We Believe In Karma

We pulled it off right in front of your eyes like it was magic / they'll find us dead for this / they'll find us dead / when you paint the town a lovely crimson red just wait till you get home / they'll find us dead for this / they'll find us dead / they'll find us dead for smiling / the trash we were talking all last night / or the compliments we sent / we will get what we deserve / every thing that goes around / it comes back around again / the trash you were talking all last night / or the compliments you sent / you will get what you deserve / every thing that goes around / it comes back around again / stop whispering if you're going to speak you better make it good
