

# Poisonblack, X

&quot;(No)Hope!&quot;

T'was stone on my tongue  
So how did I expect you to understand  
Conceit grown too strong  
True love an excuse to submit, to demand  
Please take my hand and kill the sickness within me  
I'm sure that you can  
Not sure that you can

Did death do us part?  
Well, to us now we're truly dead  
Oh, suffer my heart  
As our funeral still lives in my head  
Please stay away and leave the sickness within me  
I'm sure that you'll stay away  
Dead sure that you'll stay

When you hear this song  
Know, everything's gone  
And when you hear this song  
You know you must bear along  
Or are you playing the part as if your heart's forgotten?  
Entire  
Unscarred

What a perfect disaster  
Absorbing shit from left to right  
But making love we did master  
That constant battle our primal fight  
Please touch again and awake the sickness within me  
Touch me again dear  
Come, touch me again

When you hear this song  
Know, everything's gone  
And when you hear this song  
You know you must bear along  
Or are you playing the part as if your heart's forgotten?  
Entire  
Unscarred

When you hear this song  
Know, everything's gone  
And when you hear this song  
You know you must bear along  
Or are you playing the part as if your heart's forgotten?  
Entire  
Unscarred

When you hear this song  
Know, everything's gone so wrong  
And when you hear this song  
You know you must sing along  
Is this not true?  
From me to you  
I know you can feel it too
