

Puffy AmiYumi, ????

I kick your face, your proud face
The balloon in the air is about to venture out
You the last one to laugh? Who?
Be careful you don't get lost
Hey, I declare war on you
Hey, it's about time now
Your snobbish attitude, I know
What's your main point
Tired of hearing about your job
Always, with hollow curiosity
Now I take the lead
Hey, I hope more than anything
If together our collusion will most likely be abandoned
We also slip and slide through the word, you know
If for life, we'll have an end to it sometime
So you don't have to cry in the night anymore, ha!
Your stubborn voice cuts the air, desire, fastball, right on the mark
Saturday you try to look good and act as if you know
Hey, darling you
Hey, you're my secret these days
Once you fail it will be amazing
We also have tricks and make shifts
If together our collusion will most likely be abandoned
We also slip and slide through the word, you know
If for life, we'll have an end to it sometime
So you don't have to cry in the night anymore, ha!
Ha! Ha! I don't care
