Quadron, Favorite Star

Told me there was no rules When you came out of the blue Guarded myself from mornings Crushes don?t come with warning

Never have you looked so cute As when suggesting me To start something new

Labelled in your head As a simple flame But simple makes you melt Every time you hear me sing

Your favourite star Your favourite star (Your favourite star) And now I?m your favourite star You made me your favourite star

(If you got to know me)
(If you took the time)
(I wouldn?t have to tie you in)

You got to know me And you took the time

(But you keep on chasing) (What you never find) (Cos I?m still on your mind)

Cos I?m still on your mind

What you decide it?s fool Never gave any clue We will part and never speak But my voice is in your ever dream

If it was up to you I?ll be feinting as a déj? vu

Shame you couldn?t keep up To your place Now I have to leave Memories in your head

Your favourite star Your favourite star (Your favourite star) And now I?m your favourite star You made me your favourite star

(If you got to know me)
(If you took the time)
(I wouldn?t have to tie you in)

You got to know me And you took the time

(But you keep on chasing) (What you never find) (Cos I?m still on your mind)

Cos I?m still on your mind

And maybe if If you got to know me Would you change your mind

Maybe if you got to know me If you took the time Just maybe if you took the time
