

R.E.M., Sheherazade

(Berry/Buck/Mills/Stipe)

You say you make her feel all right
She says she wants you, but not tonight
You know the girl is telling lies
You try some magic in her eye

When you not there other guys come sticking around
And when you ask her what's going on
She'll only push you around

Say you don't want to talk about it
She'll tell you stories, she can bet

You know the girl, she's telling lies
You try some magic in her eyes

But when you're not there other guys come sticking around
When you ask her what's going on
She'll only push you around
Put you down

You can say what you want
But she's Sheherazade
And you don't mind
And you call when she calls
You pay the price
You're bound to fall
And all the lies don't matter at all

You say you don't want to talk about it
She'll tell you stories
You can die
You know the girl is telling lies
You try some magic in her eye

But when you're not there other guys come sticking around
When you ask her what's going on
She'll only push you around
Put you down

You can say what you want
She's Sheherazade
