

# Rage Of Light, 2.0

Over the times when you felt all alone  
The days you thought you did everything wrong  
In their universe, they are masters of your destiny  
Manipulating a truth that belongs to you

Break down their reality  
Erase negativity  
Get out of this misery  
Burn down their authority  
Embrace your duality  
Break out of this slavery

Initiating reprogramming  
Please sit and relax  
The process might hurt a bit  
But the result is worth the pain  
Starting now

Deconstructing the mind of the blind  
Installing the very essence of our kind  
Removing unnecessary boundaries  
Reconstructing the will internally  
Reprogramming the emotional system  
Deleting the inherent cerebral mayhem  
Self-esteem augmented, high priority  
Rejection of the bullshit? Certainly!

All gone, this chessboard where they locked you down  
You had to play the fool to seize the crown  
In your world, you can now alter your reality  
Taking back everything that belonged to you

Break down their hypocrisy  
Erase this insanity  
Get out of this reverie  
Burn down all inequity  
Embrace your divinity  
Break out of infinity

Initiating reprogramming  
Please sit and relax  
The process might hurt a bit  
But the result is worth the pain  
Starting now

Deconstructing the mind of the blind  
Installing the very essence of our kind  
Removing unnecessary boundaries  
Reconstructing the will internally  
Bootling the emotional system  
Deleting the inherent cerebral mayhem  
Self-esteem augmented, high priority  
Rejection of the bullshit? Certainly!

Enhancing process still running  
Please stay still  
Launching step two of the upgrade  
In three, two, one - ignition

We can give you all the arms to beat their pawns  
But eventually, you need to become your own weapon  
If you really want the system to initialize  
And finally execute the virus of their lies

Initiating reprogramming  
Please sit and relax  
The process might hurt a bit  
But the result is worth the pain

...is it?
