

# Rebecca Ferguson, Light On

We all have a journey  
That goes down different roads  
When dark in the shadows harder path we get  
Walk through it on our own  
While alone in the shadows  
I saw something shining through  
And standing there was you

You kept the light on  
For me to see  
It's like you knew through every moment  
What I need  
When I was lost out in the distance  
And needed someone to believe  
You always kept the light on for me

Happiness and heartache  
We share this all together  
You are my forget-me-not  
I hold on to you forever  
As customed as the show  
And as faithful as the moon  
Your love was my truth

You kept the light on  
For me to see  
It's like you knew through every moment  
What I need  
When I was lost out in the distance  
And needed somebody to believe  
You always kept the light on for me

And words remaining  
Weren't big enough  
To show how you how I feel  
I'm thankful that  
My dying heart  
Has ticked to something real  
And every time I feel like old  
There's heavy things you do  
A heart love mixed  
For you

Keep the light on  
For me to see  
It's like you knew through every moment  
What I need  
When I was lost out in the distance  
And needed someone to believe  
You always kept the light on for me  
The light on for me
