

Renderfly, Shine

If you think you're old and weary, battered
by the speed of sound, and if you think
your star has fallen and you're buried
underground
Then let me say I beg to differ, and if you
could see yourself in me
What I see...

Shine, you shine, how you shine. Like a
blazing star
You shine, how you shine, like a diamond
in the sun

If you're feeling lost and lonely, over
looked and over come, the
life you lead it's a common story, each of
us is born alone, but
heaven knows when we're together, all
the constellations open wide,
from inside...

Heaven knows when we're together, all
the constellations open wide,
from inside

Shine, you shine, how you shine. Like a
blazing star
You shine how you shine, like a satellite
at night
You shine how you shine, like a tiger
burning bright
You shine, how you shine, like a diamond
in the sun
