## Ride, Kaleidoscope

I know that you are thinking about me now I can feel it but I don't know how When I'm gone you will see so clear That I left some words unspoken here

All these words that I have said Float around you, fill your head All the times we laughted and cried I never thought I'd leave you behind

I don't want you to understand You will never hold me in your hand I don't want you to see my face When I fade away and leave this place

All these songs that fill my head Dance around you when I'm dead All the love I ever knew Kaleidoscopes around to you

All these words that I have said Float around you, fill your head All the times we laughed and cried I never thought I'd change your mind
