

# Roisin Murphy, Ten Miles High

Let's ride 10 miles up  
Just inside the Stratosphere  
More sky, more blue jets  
Stream by  
You're gonna love it here

Let's fly 10 miles up  
Just outside the Atmosphere  
We'll climb straight up  
Set aside your rational fear

Goodbye, little cruel World  
Never again will I ever be grounded on Earth  
Or be bound by the hurt in you  
Blue eyes offer a Brave New World  
Out in the starry skies of Paradise found

As we rise do far above  
Our little lights, in miniature  
And even your eyes can be transfixed  
Knock, knock, knock down  
Ypour heavenly door

One mile in  
It keeps pulling me back  
Have you got to ever leave?  
Higher now, there's no turning back  
Gone in the blink of an eye

Goodbye, little cruel World  
Never again will I ever be grounded on Earth  
Or be bound by the hurt in you  
Blue eyes offer a Brave New World  
Out in the starry skies of Paradise found
