

Roxette, I Want You

Like a whisper in me, I feel the warm winds coming through / I want you... / I want you... The empty streets all look the same, take me home blue morning rain / I want you... Calling pictures in my mind, when I wanna be with you / On this long distance line, how I wish that you would stay / I want you... Remember what you told me, we always wind up all alone / together... / As long as rivers will run, as long as I can see the sun / I want you... Moving pictures in my mind, when I wanna be with you / Along this long distance line, how I wish that you would say / I want you! When your nights are lonely, no, you're not the only / Just waiting for another day, how I wish that you would say, how I wish that you would say / I want you! For all the love in your eyes, for all the love that's in your mind / I want you... / I want you...
