

# Roxette, Only when I dream

To everyday there's a history  
To every love that's lost there is tragedy  
I saved the vision of you in my head  
I watched a new universe being born, raised  
And bred  
In the calm of my bed

Some might say it's over now  
I don't believe them  
If I only got to you  
I'd prove them right

Only when I dream  
I hear you, I'm near you  
I hold you close to me  
Only when I dream  
I touched you and I breathe you  
I feel you deep inside me

Things were never easy for me  
And the temple we built to stay sacred and free  
I came lookin' for more self esteem  
All I found was your voice  
On the answering machine  
Simple and clean

Some might say it's truthful gone  
I don't believe them  
If I could only talk to you  
I'd prove I'm right

Only when I dream  
I hear you and I'm near you  
I hold you close to me  
Only when I dream  
I touched you and I breath you  
I feel you deep inside me

I tried to catch a butterfly  
I tried to make a summer sky  
Heal me  
Rain exploding in my face  
Seems to fade without a trace  
Heal me

Only when I dream  
I hear you and I'm near you  
I hold you close to me  
Only when I dream  
I touched you and I breath you  
I feel you deep inside me
