

# Sabrina Carpenter, Right Now

We'll never be as young as we are right now  
We'll never see the world like we do right now  
So take in what's around you  
Put your camera down  
Take a shot, give it all you got

I have a way of getting stuck on yesterday  
I tend to miss the little things that come my way  
Always looking forward, always looking back  
They seem so near, but they're not here  
Cuz time moves on so quickly  
Without or with me  
I've got to take a breath

And slow down, slow down  
My mind is racing  
Catch up, catch up  
I've gotta pace myself  
I'm always wondering  
But I don't need to go right now

Let go, let go  
We hold our fears too tight  
Begin, begin, to live your life  
The present is our future past  
We've gotta make this moment last  
Right now

Have you ever noticed how your heartbeat feels  
When your love is so excited  
Cuz it's getting real  
Have you stopped to listen to what's in your soul  
That's your intuition, and it always knows

Time moves on so quickly  
Without or with me  
I've got to take a breath

And slow down, slow down  
My mind is racing  
Catch up, catch up  
I've gotta pace myself  
I'm always wondering  
But I don't need to go right now

Let go, let go  
We hold our fears too tight  
Begin, begin, to live your life  
The present is our future past  
We've gotta make this moment last  
Right now

Right now, right now  
Enjoy the ride, the ride that you're on  
Right now, right now

Let go, let go  
We hold our fears too tight  
Begin, begin, to live your life  
The present is our future past  
We've gotta make this moment last  
Right now
