## Salamandra, Metal Fever

We rock through night We're metal knights coming to give the right direction it's your redemption

We blow your mind We'd like to see banging your heads with satisfaction with affection

The guitar vibrates crunching so high charging the air Go mad go insane get all your power out to share

The metal beast cannot be ceased gets everyone that's our evil heavy metal fever

Riding so wild Nobody's mild give what you've got that's our evil heavy metal fever heavy metal Hell

We ride through night our metal steeds feeling the rage the right explosion your fate's been chosen

We have fierce guts we hold heads high to show our pride with real emotion with devotion The guitar vibrates crunching so high charging the air Go mad go insane get all your power out to share

The metal beast cannot be ceased gets everyone that's our evil heavy metal fever

Riding so wild Nobody's mild give what you've got that's our evil heavy metal fever heavy metal Hell
