

# Sarah Connor, I'll Find You In My Heart

Hey Hmmmmmm  
What ever happened to our lovescene  
Somethin' that we may never know  
The touch of your tender hands  
That once curess your soul  
But I never thought a day you have to go  
I will always find you in my heart  
No matter if we're near or if you're far  
I just have to close my eyes  
Just make a wish, I see you there  
And all my dreams come true  
(Whenever you're not right here by my side)  
Then I know forever you'll be mine  
No matter if you're close or far  
I'll find you in my heart  
Walking alone I hear your footsteps  
Lyin' alone and feel your breath, uuhh  
(Lyin' alone I feel your breath)  
Wish I could turn back time  
When love was also mood  
And I realize I miss the times with you  
I will always find you in my heart  
No matter if you're near or if you're far  
I just have to close my eyes  
Just make a wish, I see you there  
And all my dreams come true  
(Background)  
Then I know forever we'll be mine  
No matter if you're close or far  
I'll find you in my heart  
I'm not gonna let the pain displace be  
I'll do everything I've got to do to  
hold you near and find you in my heart  
I never believed that friends and lovers  
simply walk away  
So I ask of you (ask of you)  
If the love was true (love was true)  
Why couldn't you just stay (couldn't you stay)  
Yeahhyeah  
I will always find you in my heart  
No matter if you're near or if you're far  
I just have to close my eyes  
Just make a wish, I see you there  
And all my dreams come true  
(And all my dreams come true)  
Then I know forever you'll be mine  
No matter if we're close or far  
I'll find you in my heart  
Baby, baby, baby I know  
I will always, I will always find you in my heart  
I just have to close my eyes  
Make a wish, I see you there  
And all my dreams come true  
I will always, I will always find you in my heart  
No matter if you're near or if you're far  
I'll find you in my heart  
No matter if you're near or if you're far  
I'll find you in my heart
